

DIVYA PRABHA J

Full-Stack Developer | Angular | C# | Node.js | Python | B.Tech IT 2026

Chennai, India | +91 8072107589 | divyaprabha1421@gmail.com | linkedin.com/in/divya-prabha-268438346 | github.com/divyaprabha12

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with production experience in Angular, C# (ASP.NET Core), Node.js, Express.js, and Python (FastAPI). Delivered a hotel booking engine, a hyperlocal service marketplace, and a real-time DevOps autoscaling dashboard — each with JWT authentication, RBAC, WebSocket backends, and clean system architecture. Skilled in REST API design, MySQL/MongoDB schema design, Docker containerisation, and OpenAI GPT API integration. CGPA 8.5/10. Open to full-time MNC roles.

TECHNICAL SKILLS

Frontend: Angular, TypeScript, HTML5, CSS3, Bootstrap, JavaScript (ES6+)

Backend: C# (.NET / ASP.NET Core), Node.js, Express.js, Python, FastAPI, RESTful API Design

Databases: MySQL, MongoDB Atlas, Stored Procedures, Normalised Schema Design

DevOps: Docker, Docker Compose, Nginx, Vercel, Render

Security: JWT Authentication, Role-Based Access Control (RBAC)

ML / Tools: Scikit-learn, OpenAI GPT API, Pandas | Git, GitHub, Postman, VS Code

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern | Qwicksoft Solutions, Chennai | Jan 2026 – Apr 2026

Stack: Angular · C# (ASP.NET Core) · MySQL

- Built a hotel booking engine with RBAC (Admin/Staff/Guest) using Angular route guards and JWT-secured APIs, eliminating unauthorised access across all portals.
- Designed a normalised MySQL schema with stored procedures for bookings, inventory and transactions — reducing query overhead across 5+ relational tables.
- Developed RESTful C# APIs and Angular portal with real-time availability checks, booking confirmation, and integrated payment gateway.

Web Development Intern | HI-FI IT Park, Tuticorin | Jul – Aug 2024

Stack: HTML5 · CSS3 · JavaScript · Bootstrap

- Converted 8+ Figma mockups into responsive, cross-browser-compatible pages (Chrome, Firefox, Safari) with pixel-accurate layouts.
- Identified and resolved 15+ UI bugs during QA cycles before production deployment.

KEY PROJECTS

HyperLocal Service Platform | github.com/divyaprabha12/Hyperlocal-services | hyperlocal-services.vercel.app

Angular · Node.js · Express.js · MongoDB Atlas · MySQL · Socket.io · JWT · Vercel · Render

- Architected a production-grade marketplace with a 3-role RBAC system (Customer/Provider/Admin), JWT-secured APIs, and Angular route guards — enforcing zero unauthorised access.
- Built a real-time booking engine (Socket.io) with live availability, two-way in-app chat, instant confirmation, and status tracking across all user roles.
- Designed provider KYC onboarding + admin approval pipeline; deployed on Vercel and Render for scalable cloud hosting.

Autoscaling Operations Dashboard | github.com/divyaprabha12/autoscaling-operations-dashboard

Python · FastAPI · WebSockets · Chart.js · Docker · Docker Compose · Nginx · Scikit-learn · Pandas

- Built a DevOps-grade monitoring platform streaming live CPU, memory, and RPS telemetry via FastAPI WebSockets to a Chart.js dashboard with sub-second refresh.
- Engineered a predictive autoscaling engine (Scikit-learn) that auto-triggers Docker scale-up/down from multi-signal evaluation (CPU + RPS + forecast confidence), eliminating manual intervention.
- Containerised full stack with Docker Compose and Nginx; added load simulation scripts and per-replica health monitoring with a persistent alert log.

EDUCATION

B.Tech – Information Technology | Anna University (PSN Engineering College, Tirunelveli) | 2022 – 2026 | **CGPA: 8.5 / 10**

CERTIFICATIONS & ACHIEVEMENTS

- Google Cloud Cybersecurity Certificate
- Generative AI in Action — IBM SkillsBuild
- Full Stack Development — Arttifai Tech
- RPA Foundation — UiPath / Naan Mudhalvan
- 3rd Prize — Brain Fingerprinting Paper Presentation, National Level Symposium, PSN Institution of Technology
